**Over five days of  
e-conferencing, we:**

## Kept the discipline connected

As a young aspiring scholar, I am really thankful for having been a part of the ECPR General Conference 2021. It was a genuinely great experience: up-to-date research, inspiring presentations, lively discussions, and themes that really resonated with my interests.

---

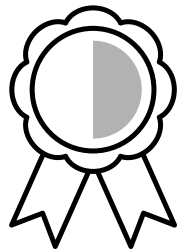

This was a wonderful opportunity to meet friends and talented researchers.

---

I believe this was one of the best conferences I have attended.

I've been with ECPR since 2006 and attended almost all General Conferences, including two virtual ones. Great experience, hope it all works great next year in person!

## **Championed scholarly excellence**

Excellent choice of Panel Chairs and very valuable feedback. For the first time, I really felt that they are the experts in this field.

An engaging event that exposed scholars to innovative research debates and methods, allowing to meet and collaborate with international colleagues.

Impressive variety of topics; the problematics presented in the Panels and the Papers are cutting edge, modern, vibrant and with state-of-the-art methodologies and techniques.

## Embraced the technology

“

The technology used was just right: did what it needed to do but without the wizzy stuff which just gets in the way.

---

“

I love the conference platform, super easy to use. Congrats.

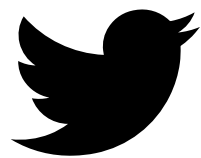

---

Really liked the use of SpatialChat for networking and more informal meetings.

The platform was well made – good job.

**Kept the  
conversation going**
